

DUTCH LAP

No more messing around with massonite or hardiboard. Our Dutch Lap panel is built to last with no upkeep. Great for any house, garage, carport, or weinscoat of a bulding, it covers 3' and has the resemblance of a 9" dutch lap siding. One can get panels ranging from 12" to 41'6". Imagine coving 120 sq feet in one piece were it would take up to 10x as many piece with other products. This means less joints and laps making it even more weather proof. We offer this panel in both 29ga and 26ga metal. (26ga recommened for panels 20' or longer). Don't wait any longer, contact us about this sharp looking built to last panel today!
